

Every year countless fires are raging in the Amazon, the sanctuary of the biodiversity on Earth. Since 2019 the fires increased considerably. Yet a rainforest does not burn by itself. Those fires are set by humans, destroying the greatest natural treasure we have.

That is exactly what this song is about. It is a cry from deep within the rainforest. The voice of the indigenous people demanding to finally put an end to that unbearable destruction.

Angie Zach lends her enchanting voice to the guardians of the Amazon and its diverse, breathtaking plants and animal life. An extraordinary song that ends with a great chromatic climax, a signature of the devil's work.

With her debut single, Angie Zach is starting her solo career: a journey from soul to soul. She connects music with love and compassion for the true self, nature, all sentient beings - our brothers and sisters - reminding us of the Wholeness/God/Buddha, the eternal BEING that is present in the tiniest leaf or the most inconspicuous insect.

Release Date: 4th of January 2021

## **BIO**

Angie Zach is a singer, performer and songwriter from Austria. Born in the Waldviertel, the magical forest quarter northwest of Vienna, she has been singing and writing already as a child. She was featured in numerous musical projects and the past 15 years she has been active in many different musical projects, mainly as a lead singer, but also as a background singer.

At the age of 17/18 she spent 10 months in Virginia (USA). There she gained valuable experience in the theater, in musicals, the high school choir, the a cappella group and the legendary "LBT Unplugged" concerts. Back in Austria, she studied Vocal Jazz and Pop in Vienna.

Angie's music is full of emotion, passion and groove. She touches with catchy melodies and profound messages. Angie's sound is melancholic, powerful, uplifting and her voice is multifaceted: sometimes clear, sometimes raspy; vigorously playing around with profound sounds that get under the skin.

Her vision and mission is to raise awareness for an appreciative, respectful attitude towards oneself, nature and the world around us. We humans have the responsibility to take care of nature – our home. Angie's music serves as a companion on the journey to the true self. Thus, it is the igniter for deep compassion for oneself and all sentient beings.
